11 Kilometres of New Electrical Grids in Pisquillo and Tiroler

Medium-voltage networks were put into service between 2014 and 2015.

Lima, 29 February 2016 – The towns of Pisquillo (Huaral) and Tiroler (Huacho), both in the Near North Coast of Lima, have now electrical grids installed by Enel Distribución Perú that will contribute to generate progress and development.

These networks will meet the 4 MW demand of local agroindustrial customers; this will mean significant savings in production costs, as oil will be out of the equation, and will contribute to the sustainability of the environment.

Throughout the Near North Coast of Lima, Enel Distribución Perú supplies with electric power about 121 thousand customers in the districts of Huacho, Huaura, Huaral, Chancay, Supe, Barranca, Pativilca, Barranca, as well as three little power plants: Nava, Hoyos Acos and Ravira Pacaraos.
