Residents of Mi Perú Can Do Sport Now in Well-Lit Concrete Pitch

Thanks to the “Más Luz para el Deporte” program of Enel Distribución Perú.

Lima, 9 September 2016 – Residents of the Mi Perú neighbourhood, in the district of San Martín de Porres, can now do sport and leisure activities at night. The 27 de Noviembre concrete pitch—located on the avenue of the same name and very neglected until recently—has been lighted up by Enel Distribución Perú; this benefits over 250 families.

The opening of the concrete pitch meant much to the neighbourhood, as it has become a multipurpose public space for families and a means for them to generate income.

Residents are very grateful; the lighting of the concrete pitch contributes to safety and encourages healthy recreation for young people. Adults and children organised a pickup football championship and a tennis match display.
