

PRESS RELEASE

ENEL WILL UPGRADE ITS FACILITIES TO BENEFIT 225 THOUSAND CLIENTS IN SAN JUAN DE LURIGANCHO

- *The company will invest 10 million soles to improve the quality of service and to satisfy the growing power demand in the most populated district in Lima.*

Lima, May 7th of 2019. – Enel Distribución Perú is currently running a project to upgrade the facilities of the Mirador Electrical Transmission Substation (SET, by its initials in Spanish), with the aim to improve the quality of service for 225 thousand clients in San Juan de Lurigancho and its surroundings. This project signifies an investment of about 10 million soles, which will also allow for improved reliability in the power supply system for Line 1 of the Lima Metro.

The project consists in the implementation of a new Transformer Bench of 220/60kV and 180MVA, with interconnected High and Low Voltage cells. Civil and electromagnetic works will be required to increase the output of the substation, which is located in the province of Huarochirí, within the limits of San Juan de Lurigancho, the most populated district of the capital. Works are expected to conclude in May of 2019.

“One of our objectives as a team is to employ the best technology at our reach to develop any project in a safe and efficient way. This implementation is proof of it, and so far we are very satisfied with the progress and the benefits of it”, pointed out Javier Villavicencio, Head of High Voltage Construction of Enel Distribución Perú.

Enel Distribución Perú is a power company of the Enel Group, an Italian company with presence in more than 34 countries. Currently, it has 1.4 million customers in Northern Lima, Central Lima and the Near North Coast of Lima.
