ENEL IMPROVES LIGHTING OF MOQUEGUAN SCHOOLS

Enel awarded the Fernando Belaúnde Terry School with an efficient lighting kit for achieving first place in the contest "Awareness for the Efficient Use of Energy: Let's Protect Our Planet", organized by the Regional Directorate of Energy and Mines in Moquegua. Ten educational institutions from the Mariscal Nieto province participated in the contest, with the aim of raising awareness about the responsible use of energy.

The kit delivered by the company included 27 LED fluorescents, 3 LED luminaires, and 3 parabolic pastorals, which will improve the lighting of the educational institution and benefit more than 500 children and young students.

More end-of-year activities

Enel also conducted a Christmas campaign with neighbors from Pampas de Clemesí in the Moquegua district. On Friday, the company handed out hot chocolate and gifts to over 20 children of the Clemesí and PRONOEI Clemesí Schools, who were able to enjoy a joyful moment with their families.
