

## STATEMENT

### Electrical service in Mesa Redonda

We stand by all the people affected by the devastating fire that took place last weekend in Mesa Redonda. Given the situation, we would like to inform the citizens about the actions that are being undertaken by Enel:

1. Immediately after the fire started, our emergency crews rushed to the area and contacted the fire department, which requested the suspension of the electrical service in the entire area as a safety measure to avoid further accidents. During this initial moment, about 1300 clients, both households and businesses, had their service temporarily interrupted.
2. In coordination with the firemen, we have been progressively restoring power in a safe way, and by this time there are only 197 clients left to attend, which represents only 15% of the initial figure. These clients are businesses and households directly affected by the fire, which in the majority of cases have had their electricity meters reduced to ashes. This makes it impossible to restore their power.
3. To all the clients who have already had their power restored, we ask to take extreme safety measures in their homes and avoid manipulating any electrical installations. In case of any anomalies, do not doubt reporting it at our telephone client at 517-1717.
4. The safety and well-being of the people during these circumstances is what matters the most. We will keep cooperating with the authorities to reach an integral solution to the problem and guarantee the safe use of electrical power.

**Lima, April 23<sup>rd</sup>, 2019.**
